Re: Reply Comments DA 12-1863, IB Docket No. 12-340; RM-11683

Dear Ms. Dortch:

I write today to support FCC action on LightSquared's proposal to deploy a nationwide mobile broadband network. I agree with the many people and organizations that have written to the FCC that the merits of the company's proposal deserves further exploration and that any technical challenges should be addressed through FCC rulemaking and other regulatory proceedings.

As a freelance writer, I draw inspiration from just about everywhere and sometimes during random moments. In lieu of notepads, I now use mobile devices such as my phone or tablet to jot my thoughts down. Also while away from cable or wifi connections, I would like the freedom and confidence to be able to connect to the Internet and access my cloud services or conduct research.

As many commenters have noted, LightSquared's service would increase the reliability of many wireless service providers and lower costs. These benefits are undoubtedly in the public interest and provide ample reason to move forward with LightSquared's approval process.

Thank you for your time and consideration.

Sincerely,

A handwritten signature in cursive script that reads "Jean J. Brown".

Jean Brown
